

FLEXILUX LOW COST FIBERSCOPES

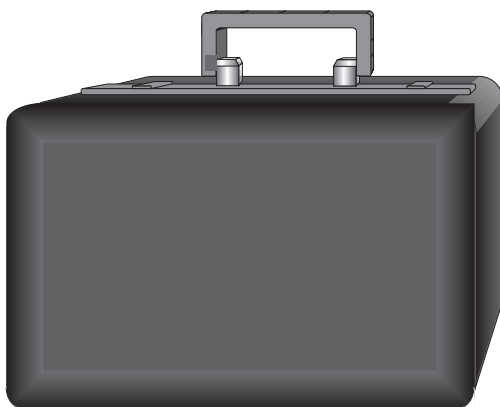

with 4-way tip-deflection

The ultimate optical instruments for tests and inspections of inaccessible areas in turbines, tubes, tanks, etc. High flexibility and robustness combined with the proven system of interchangeable objectives allow fast adaptation to new inspection tasks.

Technical Data

- High resolution image guide with good contrast.
- One-hand operation due to ergonomically designed hand section and control-levers.
- Standardized eyecups and light guide connections (ACM) as well as the proven Schölly-System of interchangeable objectives guarantee high versatility.
- 4-way tip-deflection with small tip-radius for high flexibility.
- Temperature resistant from -50° to $+185^{\circ}$ F.

The price of one fiberscope includes one objective of your choice (see separate list), a transport and storage case, cleaning material and one temperature resistant light guide (LL.48180.FX, look at Page -400-).
