

MINIFLEX MODULE FLEXIBLE

For internal examination and inspection of small tubes and bores the MINIFLEX MODULE series offers a system that combines outstanding versatility with first-class optical systems. Diameters are available from 0.35 - 2.0 mm and working lengths up to 6000 mm can be offered for the bigger systems. All probes can be used with standard and variozoom oculars or TV heads.

Code No.	Working diameter (mm)	Working length (mm)	Viewing direction	Field of View	Image bundle (pix.)
